

9.11 Check21 Solution: CheckLogic – What, How and Why...

Class length: 1 hour

Summary

This course covers eDOC Innovations' C21 product - CheckLogic. What is C21, how does it work and what it can do for your CU are all covered. Additionally we will discuss what equipment is required and how operations of the CU are affected. Lastly we will discuss Merchant capture and CheckLogic Lite, two eDOC products that enhance CheckLogic by allowing for remote member deposit.

Audience

This course is designed for those wishing to pursue a C21 product or wishing to migrate from their existing solution.

Objectives

By the completion of this course, students will be able to:

- State the necessary equipment for eDOC Innovations' CheckLogic product.
- State the benefits of such a solution to the CU.
- Participate in a demonstration of the CheckLogic product.
- Explain what Merchant capture is and how it can benefit the CU and it's members.
- Articulate how the operations of the CU will change with the implementation of the CheckLogic product.
- State how to get started with this product if so desired.

Topics Covered

- What is C21?
- What is CheckLogic?
- The benefits of CheckLogic
- How will CheckLogic affect my day to day operations?
