

## 12.31 DR Considerations For Your inHouse eDOC Server: How eDOC Innovations' ISync Product Can Help

*Class length: 1 hour*

### Summary

---

This course covers DR considerations for your in-house eDOC Innovations server. Specifically we will discuss factors that warrant consideration when crafting the successful DR plan, tactics and methods for accomplishing DR of your server and lastly, how eDOC Innovations' ISync product can take the worries away when it comes to DR of your server.

### Audience

---

This course is designed for those wanting to learn more about DR as it applies to their eDOC server as well as those seeking assistance to make sure their eDOC server is covered should the worst occur.

### Objectives

---

By the completion of this course, students will be able to:

- State the key eDOC system components and data that must be preserved under the CU's DR plan to prevent data loss.
- Define RPO/RTO.
- Explain the relationship between RPO/RTO and costs.
- Analyze the CU's present DR plan and determine if there areas that require attention to come in line with the CU's objectives.
- State what eDOC's ISync product is and how it works to protect the CU in a DR situation.

### Topics Covered

---

- Key system components and critical data.
- RPO/RTO
- Various DR solutions
- Isync
- Questions and Answers
