

logical solutions for report and statement management

PUTTING NECESSARY REPORTS AT THE FINGERTIPS OF YOUR STAFF FROM ANY WORKSTATION

2020COLD®

2020COLD® makes centralized reports accessible to all of your PC desktops. The report view includes the "green bar" screen and full page display. Reports look exactly as they look on paper with the very same text layout. Staff will find it easy to use because there is no change in report orientation. That translates into minimal staff training and faster adoption. With as few as five minutes of training, a current Windows user can effectively use 2020COLD®.

2020COLD® REPORT AND STATEMENT MANAGEMENT SYSTEM

Utilizing the automated "Searching Tool", users can quickly sort through the report for any amount or part of an amount, account number, transaction code, or account holder name, even search across a date range of many reports. Out-of-balance items can be resolved in a matter seconds; auditing historical reports is fast and simple. 2020COLD® will quickly assist staff in resolving even the most uncommon dilemmas, allowing them to be more accurate and efficient.

Key 2020COLD® product features include:

- Long-term, secured storage of report and statement data with instant access from any PC.
- Utilized in a Browser or Windows-based environment.
- Searchable Sticky notes allow employees to create digital notes that previously were hand-written on reports.
- Ability to search multiple reports over multiple locations or timeframes with just one search.
- Ability to limit your search to a single column or set of columns.
- Lock column titles to make scrolling through detail more productive.
- Easily conduct a search for specific information across large volumes of reports.
- Easy viewing of an entire 132 column report on normal windows monitor without scrolling right or left.
- Instant online access of statements. Multiple statement types can be stored simultaneously. i.e. Draft, credit card and Quarterly statements.
- Customized form or graphic overlay of statement and other periodical disclosures. I.e. Tax documents, CD Maturity notices. Documents appear just as their printed counterparts.
- Secure statement records for privacy of Executive, Board or employee statements.
- Open file architecture with CD-R or DVD media used for permanent record retention.
