

PRODOC-IT VIRTUAL PRINTER

VERSION: 8.6.0.0

RELEASE DATE: AUGUST 20, 2019

ProDOC-It is a virtual printer that interfaces with ProDOC to capture documents for indexing and signing. This allows users to capture documents by simply printing them to the ProDOC-It printer. It can be configured to output both image and text files which can be used to automatically index the document. Image resolution, color depth, and format can be selected via an admin application.

PRODUCT UPDATE

- Rebuilt with a new driver from colorpilots. This was done to fix an intermittent issue where filenames of tiff and text outputs were different which was causing ProDOC to break.

SYSTEM REQUIREMENTS

For best results, this version of ProDOC-IT Printer should be used with ProDOC 7.7.0.8 and later.

Contact eDOC's Client Development team at 800.425.7766 option 2 or csr@edoclogic.com for information on licensing and setup of compatible applications.

eDOC Innovations officially supports:

- Windows 7, 8, 8.1, 10
- Windows Server 2008R2 and Server 2012
- Internet Explorer 11.x, Chrome 46.0.2490.86 and Firefox 42.0

Other OS and third party applications may or may not be 100% compatible and are not officially supported.
