

## Tech Tip #21: What happened to the Manage Documents button?

To simplify eDOCSignature's main landing page, we have renamed, consolidated and added buttons. But all the same functions are available. \* So where'd the Manage Documents button go?

Documents previously found in *Manage Documents* can now be found in *Manage Packages*.

We have consolidated the functions *Create Templates* and *Manage Templates* into one new button - its the new *Set Up Templates\** button.

And we added a new button - *Setup Package Types\**. Package Types let you group multiple templates (signing, reference, requested) into one package and generate a link to the package. Once the link is created, you can embed that link into your website, allowing your members to complete the process of any application, anytime from anywhere.

## Setup Package Types
