

Tech Tip #26: Trying to locate your eDOC software installers?

Look no further, your eDOCLogic installers are located on your server in the [\\MyeDocServerName\edisoftware](#) folder.

(Replace the MyeDocServerName with the actual name or IP address of your server).

Simply enter this location into the address field of the Windows File Explorer you will find folders with all of your installers.

*In rare, older installations, the location may contain the underscore “_” in the name, such as [\\MyeDocServerName\edi_software](#)
