

Archive

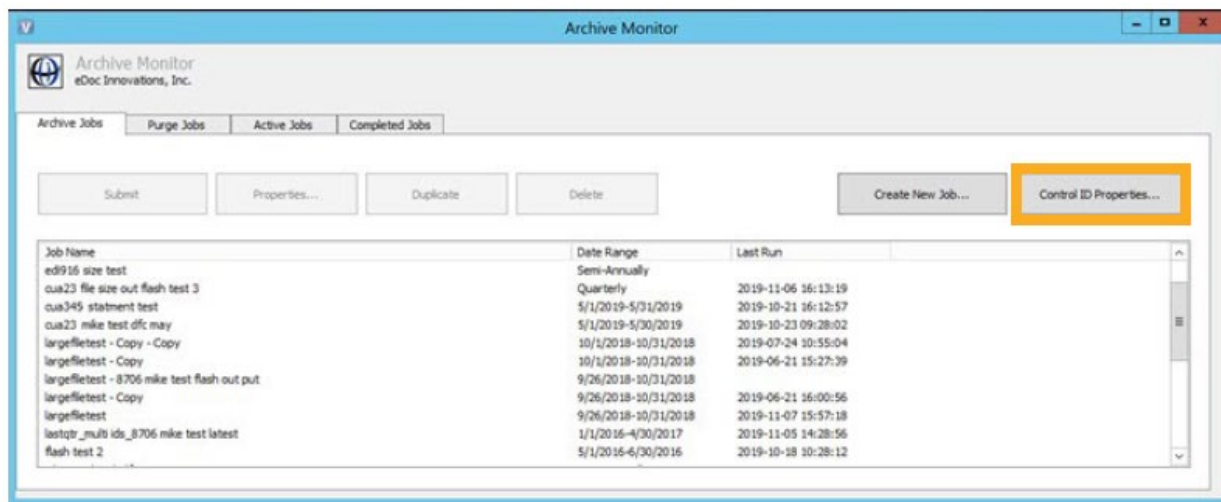

VERSION: 8.8.0.1

RELEASE DATE: FEBRUARY 25, 2020

Archive is an administrative application that enables the archiving and purging of data. It allows the user to set up and run Archive jobs that create CD, DVD, flash, or disk images from document files within the DocLogic system. The user selects document files to be included in each job by entering a range of values in date fields or defining other criteria. Users can also run Purge jobs to permanently remove files from the DocLogic system.

NEW PRODUCT RELEASE:

Archive has been fully redeveloped and redesigned to include a more intuitive interface, allowing for easier job setup functionally.

Archive allows for various types of date range options, various output types and purging of your documents. For more information on Archive, please contact [eDOC Client Development](#).

SYSTEM REQUIREMENTS

eDOC Innovations officially supports:

- Windows OS 8.1 and Windows 10
- Windows Server 2012 and 2016
- Internet Explorer 11.x, Chrome 46.0.2490.86, and Firefox 42.0

Other OS and third-party applications may or may not be 100% compatible and are not officially supported.
