ISAPI Gateway

VERSION: 7.10.0.0

RELEASE DATE: AUGUST 25, 2020

The ISAPI Gateway is a web server application that is used by 2020eDOC, 2020iDOC and idocVAULT web sites. It receives requests from the PHP pages and passes them through to back-end application servers. It then takes the server responses and forms them into PHP for use by the pages.

PRODUCT UPDATES

- Modified to allow update settings read to accommodate larger settings files.
- Modified logic so it steps to the next entry in the Document Server, Security Manager, or CLMgrServer list after only one failed attempt to connect. It goes through the whole list multiple times.
- Added an option to specify a host and port for a specific command in the SecurityManager, DocumentServer, or CLMgrServer list.

SYSTEM REQUIREMENTS

To be fully functional with the latest features, this version of ISAPI Gateway should be used with 2020eDOC PHP web pages 8.10.0.0 or later, idocVAULT PHP web pages 8.10.0.1 or later, ISAPI WebPortal 7.10.0.0 or later, Document Server 7.10.0.3 or later, and Security Manager 7.10.0.2 or later.

eDOC Innovations officially supports:

- Windows OS 8.1 and Windows 10
- Windows Server 2012, 2016, and 2019 Standard R2
- Internet Explorer 11.x, Chrome 46.0.2490.86 and Firefox 42.0

Also, Other OS and third-party applications may or may not be 100% compatible and are not officially supported. For more information on hardware requirements click here.

For information on licensing and setup of compatible applications contact eDOC's Client Development team by clicking here.
