

ISAPI Web Portal

VERSION: 7.10.0.0

RELEASE DATE: AUGUST 25, 2020

The ISAPI Web Portal is a web application that is used by 2020eDOC, 2020iDOC, and idocVAULT web sites. It receives web requests from external applications and passes them to the back-end application servers. It then processes the server response to send a reply back to the requesting application.

PRODUCT UPDATES

- Modified update settings read to accommodate larger settings files.
- Modified logic so it steps to the next entry in the Document Server or Security Manager list after only one failed attempt to connect. It goes through the whole list multiple times.
- Added an option to specify a host and port for a specific command in the Security Manager or Document Server list.
- Added an option to have a separate section in the RDI.ini file to specify the Document Server host/port List and Security Manager host/port List for connections from the DocLogic Web Portal.
- Added an Info action which pulls information about the system setup for the ISAPI
- Separated sensitive data from the Status call and put into Info action.
 - Both Status and Info request can be hidden behind a required Token.
To set this up add the following settings in the RDI.ini

```
[DocLogicPortal]
InfoToken=123
StatusToken=123
```

Sample request using token: <http://127.0.0.1/ISAPI/DLSapiWP.dll/Info?Token=123>

SYSTEM REQUIREMENTS

To be fully functional with the latest features, this version of ISAPI WebPortal should be used with 2020eDOC PHP web pages 8.10.0.0 or later, idocVAULT PHP web pages 8.10.0.1 or later, ISAPI Gateway 7.10.0.1 or later, Document Server 7.10.0.3 or later, and Security Manager 7.10.0.2 or later.

eDOC Innovations officially supports:

- Windows OS 8.1 and Windows 10
- Windows Server 2012, 2016, and 2019 Standard R2
- Internet Explorer 11.x, Chrome 46.0.2490.86 and Firefox 42.0

Also, Other OS and third-party applications may or may not be 100% compatible and are not officially supported. For more information on hardware requirements click [here](#).
