

Security Manager

VERSION: 7.10.0.1

RELEASE DATE: AUGUST 25, 2020

Security Manager is a backend server application that is used by 2020eDOC, 2020iDOC, and idocVAULT web sites. This application provides security-related functions such as user and customer login, single-sign-on processing, account maintenance functions and multi-factor authentication support.

PRODUCT UPDATES

- Modified to speed up commands that were using the SQL database.
- Fixed a memory leak when downloading security file with settings.
- Made additional changes to improve performance.
- Fixed an issue with the unenrollment of customers.

SYSTEM REQUIREMENTS

This version of Security Manager requires MySQL Configurator 8.10.0.4 or later, 2020eDOC PHP web pages 8.10.0.1 or later, idocVAULT PHP web pages 8.10.0.1 or later, ISAPI Gateway 7.10.0.1 or later, and ISAPI Web Portal 7.10.0.0 or later.

eDOC Innovations officially supports:

- Windows OS 8.1 and Windows 10
- Windows Server 2012, 2016, and 2019 Standard R2
- Internet Explorer 11.x, Chrome 46.0.2490.86 and Firefox 42.0

Also, Other OS and third-party applications may or may not be 100% compatible and are not officially supported. For more information on hardware requirements click [here](#).

For information on licensing and setup of compatible applications contact eDOC's Client Development team by [clicking here](#).

USER DOCUMENTATION
