

Automigrator

Make it simple

Every credit union needs a comprehensive document management strategy.

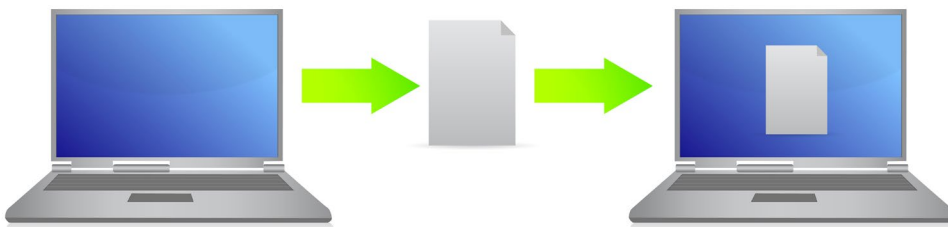

Migrating documents to one storage solution is easy. Automigrator will process lending or member service forms, ancillary documents, or documents that have been scanned by a third party into your DocLogic core image processing system. Keep all vital member documents stored in one location for instant retrieval by your staff. Further leverage your DocLogic solution by making documents available to your members via the secure and easy to use eDOC Member Document portal*.

**Additional software licensing may be required.*

Features of Automigrator

- Auto import and encryption of documents utilizing file name for indexing.
- Auto import of documents via a CSV file with index info and image.
- Runs as a system service.
- Supports multiple servers and import locations.
- Complete logging of importation process.
- Reduce archival research time.
- Minimize third-party seat fees.

Innovation. It's what we do.

Start managing ALL your documents today!
